PROFESSIONAL SUMMARY

Results-driven **Java Spring Boot Developer** with 3.6+ years of experience in designing, developing, and deploying scalable web applications and microservices. Skilled in **Java 8/11/17, Spring Boot, REST APIs, Hibernate, JPA, and Microservices** architecture. Proficient in integrating backend systems with databases, cloud platforms, and messaging systems. Strong background in problem-solving, system design, and performance optimization, with hands-on experience in CI/CD pipelines, containerization (Docker), and cloud deployment. Passionate about learning new technologies and delivering clean, efficient code in collaborative environments.

PROFESIONAL EXPERIENCE

Senior Software Engineer, Exafluence

Bangalore, India | Feb 2023 – Present

- Experienced in designing, developing, and deploying **enterprise web applications using Java, Spring Boot, React.js, and Microservices**.
- Strong expertise in building secure and scalable **RESTful APIs**, implementing authentication and authorization using **Spring Security and Keycloak**.
- Proficient in developing **backend services, metadata-driven platforms, and workflow automation** with a focus on performance, **scalability, and maintainability**.
- Hands-on experience with **PostgreSQL, MongoDB, Kafka, Docker, Kubernetes, AWS**, and modern **CI/CD** practices for cloud-native application deployment.
- Skilled in developing **responsive React.js applications** and integrating them seamlessly with **Spring Boot Microservices**.
- Experienced in designing **multi-tenant architectures, configuration-driven solutions, and enterprise-grade applications** for large-scale systems.
- Familiar with **event-driven architecture, asynchronous messaging, and distributed systems** to build reliable and resilient applications.
- Strong understanding of **Object-Oriented Programming (OOP), Design Patterns, SOLID Principles, Clean Code**, and **Agile/Scrum** methodologies.

PROJECTS

Program Integrity (POC) | Exafluence for Amida

Bangalore, India | April 2026 – Present

- Developed **fraud detection pipelines** for **T-MSIS Medicaid claims** using **Databricks, Spark, and Apache Iceberg**.
- Built **deterministic and graph-based fraud detection rules** leveraging **FalkorDB** for relationship analysis.
- Used **ExfHarmonize** to orchestrate configurable ETL pipelines across Bronze, Gold, and Active data layers.
- Automated **end-to-end data workflows using Dagster** and stored fraud detection results in PostgreSQL.
- Developed metadata-driven rule execution pipelines for scalable healthcare fraud analytics.

ExfHarmonize | Exafluence

Bangalore, India | Sep 2024 – March 2026

- Developed **Spring Boot REST APIs** for metadata management, ETL orchestration, transformation rules, and data quality validation.
- Built **React.js** low-code UI for metadata mapping, drag-and-drop pipeline design, and transformation rule configuration.
- Implemented configuration-driven multi-tenant architecture using **Java SPI** for tenant-specific feature enablement and custom plugin support.
- Integrated **Apache Spark** execution across **Kubernetes, AWS EMR, Azure, Google Dataproc**, and on-premise clusters.
- Integrated **Keycloak** for authentication, authorization, and **RBAC**. Built configurable IAM modules for users, roles, groups, permissions, and policies.
- Developed document management with versioning, OCR, and full-text search using Apache Tika.
- Integrated Apache Superset for self-service analytics and reporting.

SCMXPRT – Supply Chain Management Project using IOT Devices | Exafluence

Bangalore, India | Feb 2023 – Aug 2024

- Developed backend services using Spring Boot and frontend with React.js, secured with **Keycloak** for authentication and authorization.

- Implemented **Confluent Kafka** to reliably capture and persist IoT device messages, ensuring zero data loss; integrated with **AWS S3** for storage and consumed data streams into **MongoDB** for scalable persistence.
- Built **AWS Lambda functions** triggered by **S3 events** to generate and attach documents to shipments, integrating with client-side **SAP uploads**.
- Deployed the application on a **Kubernetes cluster**, ensuring high scalability and reliability for production workloads.
- Integrated **AWS S3 with GCP GCS** to enable seamless cross-cloud file transfers between the system and client infrastructure.
- Utilized **MongoDB** for scalable data storage, optimizing performance for supply chain operations.
- Delivered the solution to **Dr. Reddy's Laboratories**, ensuring robust, enterprise-grade supply chain management.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, JavaScript, Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Spring Data, Microservices, React JS, Spring AI, Spring Cloud
- **Databases:** SQL, PostgreSQL, MongoDB
- **Messaging & Streaming:** Kafka, Redis
- **DevOps & Cloud:** Docker, Kubernetes, GitHub Actions, AWS, Jenkins
- **Other Tools:** Git, Maven, SonarQube, Mend, IntelliJ, Postman

EDUCATION

Bachelor of Technology in EEE	2018-2022
Audisankara College of Engineering & Technology Gudur, Affiliated to JNTUA University, India	CGPA: 8.68

CERTIFICATES

- [SI Associate Certification, MongoDB](#)
- [Container Orchestration using Kubernetes, Simplilearn](#)
- [Azure Fundamentals AZ – 900, Microsoft](#)
